

LITHIUM BATTERY TRAINING

Lithium Battery Training

Our Lithium Battery training course is suitable for anyone who ships Lithium Ion or Lithium Metal Batteries on their own, packed with, or contained in equipment by Air, Road and Sea.

If you haven't completed any other Dangerous Goods Training and solely ship Lithium Batteries, this is a Lithium-Battery Specific Course which will qualify you to ship Lithium Batteries by Air, Road and Sea - this course will also enable you to have approved freight accounts with the main freight carriers (DHL, DPD, UPS, FedEx).

If you have previously completed, or are booking the Full Dangerous Goods by Air, Road and Sea course, there is no need to complete this course as all Lithium Battery Training will be covered on the full course.

If you ship any Dangerous Goods other than Lithium Batteries, you will need to undertake the full Air, Road and Sea training instead of this course.

There are three types of Lithium Battery Training:

- **Large Batteries course (all Lithium Batteries) - 2 Days**
- **Small Lithium Batteries (batteries loose <100wh, and in equipment - 1 Day - booked upon request.**
- **Small Lithium Batteries <100wh in device/equipment only - 4 hours (E-Learning)**

Our scheduled Large Batteries courses are all being held online - we will send you all of the course material and our instructor will guide you through all the learning virtually online.

Our Small Battery course is an online self-learn course which you can undertake at any time day, or night, as it suits you.

If you're not sure which course is right for you, contact us and we will be able to assist.

Scheduled courses for 2025
